

**SPM**™

Specification  
Product Materials

# The UNIQUE Solution for your Specification Material Needs

## Asphalt Emulsions

UNIQUE has a variety of specification-based emulsions such as Slow Setting (SS) Medium Setting (MS) and Rapid Setting (RS). All are available in various grades and strengths. UNIQUE can custom formulate asphalt emulsions to meet your raw material product needs for coatings, sealants and primers.

## Asphalt Cut Back

UNIQUE has a wide variety of specification-based slow cure asphalt cut backs such as Slow Cure SC 250, SC 800, SC 3000. UNIQUE can also custom formulate asphalt cutbacks to meet your raw material product needs.

## Custom Designed to Meet your Specifications

- › **Additives:** UNIQUE has a wide variety of additives available to help formulate your asphalt or asphalt emulsion product needs. Our additives are designed to increase your asphalt material's coating, adhesion and water resistance properties.
- › **Finished Cold Mix:** UNIQUE can formulate and manufacture a wide variety of bulk and packaged cold mixes designed to meet your needs. Our laboratory's capabilities enable us to formulate an additive package specific to the characteristics of the aggregate available to suit your needs, which creates a product that performs to specification.
- › **Private Label:** UNIQUE can offer private label services for all of our SPM™ products.
- › **Testing and Design:** UNIQUE can offer testing and design services for development of your specification-based products. Our state-of-the-art cold mix and liquid laboratory can help you formulate your product to perform as needed.

*The UNIQUE specification and custom blend materials are guaranteed to meet or exceed specification needs. Call us today with your requirements!*
